

K-Tramp Metal Separation

Industrial Magnetics specialises in industrial strength separation magnets for the removal of ferrous metal contaminants from dry or liquid product flows and is the first manufacturer to offer 52 MgOe rare earth material as a standard in select products. These magnetic separators are used in industries such as food, chemical, plastics, as well as feed and grain, to improve product purity and protect processing equipment from damage.

While available in standard sizes, strengths and designs to meet most applications, Industrial Magnetics specialises in modified standard products and custom solutions, and offers design and engineering assistance for unique or difficult applications. Industrial Magnetics separation magnets have improved end-user productivity in reduced downtime and contaminated product recalls.

Gravity Feed Magnets: in the Product Stream

- Magnetic Grates
- Drawer-In-Housings
- Large Tube Housings

Gravity Feed Magnets: outside the Product Stream

- Plate Style Magnets
- Extractor Magnets
- Hump Magnets

Pneumatic Line Magnets

- Bullet Magnet
- Pneumatic Line Housing
- Exposed Pole Tube
- 4JIT Vacuum Line Magnet

Conveyor Line Magnets

- Suspended Permanent Overhead
- Magnetic Separation Pulley
- Drum Separators
- Eddy Current Separators

Liquid Line Magnets

- Plate Style T-Trap
- Tube Style T-Trap

Magnetic for Plastics Processing

- Magnetic Grates
- Drawer In-Housings
- Granulator Plate Magnet
- 4JIT Vacuum Line Magnet

Oil Field Magnets

- Open Hole Net

Miscellaneous

- Magnetic Pull Test Kit
- Magnetic Inspection Probe
