

MTD Disc Tracker

The MTD Disc Tracker is a high performance economical means to track and align a wandering conveyor belt, which suitable for most installations and applications.

The MTD Disc Tracker fits both flat and vee return rollers as well as troughing rollers. Ideally they are located in pairs prior to the tail pulley to help align the conveyor belt, and so eliminating spillage from tracking belts. They can also be installed after the feed area on the troughing sets to help keep the belt aligned.

Key Benefits:

- Easy installation - split on one side to slip over the roller
- High wear resistant grade of Polyurethane used
- No damage to belt edges

| Part Number | Description | Assembly Weight (kg) |
|------------------|-----------------------------|----------------------|
| DISC-102-TRACKER | MTD Disc Tracker 102 - Pair | 4.4 |
| DISC-114 TRACKER | MTD Disc Tracker 114 - Pair | 4.6 |
| DISC-127 TRACKER | MTD Disc Tracker 127 - Pair | 5.0 |
| DISC-133 TRACKER | MTD Disc Tracker 133 - Pair | 5.1 |
| DISC-152 TRACKER | MTD Disc Tracker 152 - Pair | 5.6 |
